
I can't get this to work at all...

Posted by aphils - 2009/01/23 00:32

Even though I have documents in a category, the module displays "No Documents".

Any ideas? I'm in J!1.5.6 with DocMan 1.4.0 RC3, also using JACL, but the categories I am trying to point to are public.

NEVER MIND! Stupid user error having to do with DOCman's permissions. Sorry!

Hi,

Sorry I have not tested it with J1.5 I am not sure if it will work with J1.5
